The CNT Year-long Practitioner Training Program

The Chi Nei Tsang practitioner applies techniques to de-stress and energise the whole body-mind, through the organs where we feel our emotions. This unique holistic massage releases tension, helps detoxification, promotes a healthy flow of energy through the meridians of Chinese medicine (like acupuncture but without the needles!) and has been known to help with relieving symptoms, easing aches and pains, and general maintenance of health and vitality - **you don't have to be ill to feel better!** You learn to help others, and it also works for D-I-Y. This training leads to a recognised qualification, membership of a Professional Association and eligibility for insurance.

Tuition and Practice is in FIVE parts to master the knowledge and techniques:

- (1) Three Chi Nei Tsang Training Weekends;
- (2) Completing the first three Steps of the Foundations of Taoist Practice;
